

A wooden mannequin head and torso are positioned on the left side of the frame, leaning against a window frame with horizontal blinds. The mannequin is facing away from the camera, looking out over a city street. The street is lined with multi-story buildings, some with signs and awnings. The sky is blue with some clouds. The overall atmosphere is contemplative and urban.

ESSENTIAL.

FLEX FIT PROGRAM

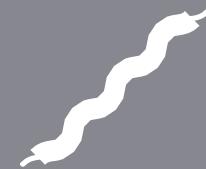

Hans Boodt Mannequins has developed an innovative fitting line ensuring more usability and better quality. This unique system is more durable, faster and easier.

The magnetic search function ensures that both parts find each other with ease.
A click will tell you that the system is locked.
The designed brushed metal bolt with black rubber edge provides super grip and extra stability.
An improved calf hole, with calf hole protection will slide smoothly over the calf pin.

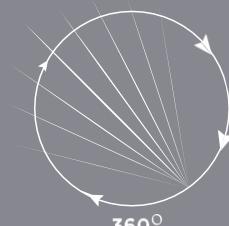

LET'S MAKE IT
WORK FASTER,
EASIER AND
MORE DURABLE.

CLICK

FLEX

POSE

PATENTED FLEXFIT ARM FITTING

- The upper arm easily finds the torso, due to the action of the magnet system.

- The upper arm is flexible and can be pulled outwards, making it easy to remove fabric that has been caught in between.
- The arm closure can rotate 360 degrees.

FLEXFIT LEG SYSTEM

- The Flexfit system can be used by pushing the legs towards each other.

- It's easier to put on trousers.
- The system can be recognised by the red sticker.
- The Flexfit system comes standard on wide leg poses or as requested.

IMPROVED CALF HOLE

- Protects the calf hole.

- Will slide easily over the calf pin.
- Ensures the (correct) stability of the mannequin.
